Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 8/9/04.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first and second banks interleaved in each row in an alternating fashion as recited in claims 1-12 and 14-60 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-12 and 14-60 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It not understood the feature of "the first and second banks interleaved in each row in **an alternating fashion**" as recited in claims 1-12 and 14-60 since it is not seen in the drawings of the present invention. Even if Fig. 3 of the present invention does

Art Unit: 2818

show that bank 0 and bank 1 are alternately connected in each row, however, Fig. 3 and the specification do not described the different structure inside of each of banks 0 and 1. Therefore, all banks in each row in Fig. 3 are not seen to be interleaved in an alternating fashion but to be in array.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-12 and 14-60 are, insofar as understood, rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Fig. 1 Prior Art.

Applicant's Fig. 1 Prior Art discloses a memory device comprising:

- a plurality of memory banks BANK 0 to BANK n-1 each including a plurality of memory cores;
- a plurality of shared sense amplifiers SENSE AMPS;
- wherein: the memory cores from two of different adjacent ones of memory banks are interconnected with each other along the row direction (horizontal axis) via a shared sense amplifier;
- column decoders 110;
- column decoder conductors 160 traverse the memory cores in the horizontal strip;
- as shown in Fig. 2, sense nodes 232 and 234;

Art Unit: 2818

obviously, bank 0 can be read as the first bank, bank 1 can be read as the second bank, bank 3 can be read as the first bank, bank 4 can be read as the second bank, and so on; and the memory device in Applicant's Fig. 1 Prior Art can be utilized in a computer system which includes a processor as well known in the art.
